CS301 Database Management Systems

Assignment 2: SQL Joins and Aggregation

Northfield Institute of Technology - 2026 Odd Semester - Dr. Kavita Mehta

Submission deadline: on or before 6 November 2026, 11:59 PM

Submit one PDF on CampusAI. Late submissions are marked late.

Task

Use the schema Student(sid, name, dept), Course(cid, title, credits),

Enrollment(sid, cid, grade). Write and explain SQL for each question.

Q1. List every student with the titles of the courses they are enrolled in (INNER JOIN).

Q2. List all students, including those with no enrollments (LEFT JOIN).

Q3. For each department, show the number of students and the average grade (GROUP BY).

Q4. Show courses with more than 30 enrolled students (HAVING).

Q5. In 150-200 words, explain when a LEFT JOIN gives a different result than an INNER JOIN.

Marking scheme (20 marks)

- Correct SQL for Q1-Q4 (4 marks each, 16 marks)
- Clear explanation of join behaviour in Q5 (3 marks)
- Neat formatting with the query output shown for each question (1 mark)
